Unduplicated Count

This section is designed to project an unduplicated count of all eligible persons to be served during the project year and their characteristics. Only supply information in the columns of the Primary Services you propose to provide for caregivers (and care receivers under Respite Care).

The applicant must estimate the number of unduplicated caregivers (and care receivers under Respite Care) projected to be served during the project year for each service. In addition, the following characteristics must be projected: race/ethnicity, rural residents, county of residence and low income status. See definitions above.

List each county in which the project will operate. Project the number of caregivers to be served by county of residence.

All spaces must be filled. If it is estimated that no persons within a certain category will be served, then place a "0" in that space.

If more than nine counties are proposed to be served, attach an additional sheet.

Volunteers

Estimate the total number of volunteers to be used in each Primary Service, the number who will be 60 years of age and older, and the number of volunteer hours to be provided.
